# FlexNet™

SmartPoint™ M2

# **Description**

#### Model 510M - Non Pit Set

The FlexNet SmartPoint M2 is a radio transceiver that provides water utilities inbound and outbound access to water measurement and ancillary device diagnostics via radio signal. The SmartPoint 510M is designed for non-submersible/non-pit installations. With its migratable, two-way communication ability, the M-Series SmartPoint functions as a walk-by/drive-by endpoint, fixed base endpoint, or combination of the two. This flexibility increases utility data collection capabilities and streamlines operations.

# **Features**

### **TOUCHCOUPLER DESIGN**

The SmartPoint M2 utilizes TouchCoupler, the patented Sensus inductive coupling communication platform, to interface with the encoded meter. With TouchCoupler, the SmartPoint M2 can connect to the meter using existing two wire AMR installations instead of requiring utilities to access the meter to install a new threewire system. This results in a fast, efficient and reliable connection at minimal cost.

#### **OPERATION**

The FlexNet SmartPoint M2 receives input from the meter register and remotely sends data to a walk-by/drive-by or fixed base collection device. The SmartPoint M2 easily migrates from walk-by/drive-by to fixed base by simply installing a Base

In walk-by/drive-by mode, the SmartPoint M2 collects data and awaits an activation signal from the Vehicle Gateway Basestation (VGB) or Hand-Held Device (HHD). Upon signal receipt, it transmits readings, the meter identification number and any alarms.

As a fixed-base endpoint, the SmartPoint M2 interacts with one or more strategically placed Base Station located in the utility service area. Top of the hour readings and other diagnostics are instantly forwarded to the Regional Network Interface (RNI) at time of transmission. The FlexNet system provides unmatched reliability by

using expansive tower receiver coverage of metering end points, data/message redundancy, fail over back up provisions and operation on FCC primary use (unshared) RF spectrum.

### POWERFUL TRANSMISSION. **FLEXIBLE PLATFORM**

The SmartPoint M2 offers several advantages that control both deployment and lifetime operation costs. It's powerful, industry leading two watt transmitter broadcasts over large distances and minimizes collection infrastructure. And once the SmartPoint M2 is installed, its migratable, two-way system platform can be updated without requiring personnel to visit each meter and/or inconveniencing customers.

## **ADDITIONAL SMARTPOINT M2 FEATURES**

The SmartPoint M2 obtains hourly readings and can monitor continuous flow over a programmable period of time, alerting the utility to leak conditions. In addition, the SmartPoint M2 stores up to 840 consumption intervals (35 days of hourly consumption), providing the utility with the ability to extract detailed usage profiles for consumer information and dispute resolution. The SmartPoint M2 also incorporates a two-port design, allowing the utility to connect multiple registers and ancillary devices (such as acoustic monitoring) to a single SmartPoint. This results in a compact installation that saves

time, space and money - without reducing system performance.

#### **SPECIFICATIONS**

**SERVICE** Wall mounted (non-pit/non-submersible) installation interfacing the utility meter to the Sensus FlexNet PHYSICAL Width: 5 9/16" x Height: 5 1/2" x

**CHARACTERISTICS** Depth: 3"

WEIGHT 1.13 lbs/18.08 oz COLOR Tan

**FREQUENCY** 900 - 950 MHz, 8000 channels X RANGE 6.25 kHz steps

**MODULATION** Proprietary Narrow Band **MEMORY** 

Non-Volatile POWER Lithium Thionyl Chloride batteries

US: FCC CFR 47: Part 90, Part **APPROVALS** 24D, Part 101C, Part 15 Licensed operation

> Canada: Industry Canada (IC) RSS-134, RSS-119, RSS-210

**OPERATING** - 22° F to +185° F TEMPERATURE - 30° C to + 85° C

WARRANTY

**OPTIONS** Dual or single port availability; TouchCoupler only, wired only

INSTALLATION The 510M is designed for side-of-**ENVIRONMENT** home applications where it is not subject to submergence.

COMPATIBILITY TouchCoupler and Wired Version: Sensus Encoded Reg-

isters Badger ADE water registers and MasterMeter AccuLinx Wired Version Only: Elster En-

coder (Sensus protocol) and Neptune ARB VI (ProRead). Hersey Translator

20 years - Based on six transmissions per day.
